This is in response Applicant's amendment filed on November 28, 2005 in which claims 1-18 were canceled and claims 19-26 were added.

Status of Claims

Claims 19-26 are pending.

Allowable Subject Matter

Claims 19-26 now renumbered 1-8 are allowable over the prior art of record.

The following is an examiner's statement of reasons for allowance: the present invention is directed to a disaster recovery system in which occurrence of a failure in a primary database processing system, the system continues execution of the data processing by replacing the failed database processing system with a secondary database processing system, and particular, technology effectively applicable disaster recovery system which using log information indicating contents of database processing executed on a database buffer of a primary host computer, database is updated in a magnetic disk device of a secondary storage system. The closest prior art [Mohan U.S. Patent no. 5,280,611] discloses a system for the recovery of transaction-based database systems of the write-ahead logging type to a consistent state following a failure. This method is practiced in a multi-system environment in which a plurality of independently executing database systems share an electronic store for caching data obtained from stable direct access storage. The database systems are all transaction-

based and use a transaction log according to a write-ahead protocol. However Mohan failed to show the claimed features and functions of the primary log block, the active database processing system, the secondary log block and secondary or standby database processing systems of the present invention as recited in the claims. Mohan also fails to teach or suggest that the write command transferred from the primary host computer to write data into the primary log block is utilized also to update the secondary log block and the secondary database as in the present invention as recited in the claims. These claimed features being present in independent claims 19 and 23 render claims 19-26 now renumbered 1-8 allowable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
